PROJECTS

Crypto-Tracker App: Developed a real-time web application to track the top 10 cryptocurrencies by market capitalization, displaying rank, name, price, and market cap.

- Technologies: React, JavaScript, Axios, CoinGecko API, CSS
- Responsibilities: Designed and developed the front-end, integrated API, managed state with React hooks, implemented error handling, and ensured responsive design.
- Key Features:
 - Real-time data fetching from the CoinGecko API.
 - Responsive design with a clean and user-friendly interface.
 - Comprehensive error handling and state management using React hooks.

Weather App: Developed a responsive Weather App using HTML, CSS, and JavaScript that allows users to search for any city and display current weather conditions and temperature by integrating with a weather API.

- Learned how to use APIs to fetch data from external services, specifically the OpenWeatherMap API for current weather and forecast data.
- Implemented error handling mechanisms to manage API request failures and invalid city inputs.
- Enhanced skills in dynamically updating the DOM to display weather information and hourly forecasts.
- Understood how to handle asynchronous operations with Promises, .then() methods, and .catch() for error handling.

Other Projects: 1) To-do List. 2) Landing page design using HTML, CSS and JavaScript
